Daewoo by Product Types To locate your free Daewoo manual, choose a product type below.

REPAIRS ADVISED

3. Disassembly and Reassembly of Major Components

3.1. Engine Disassembly

3.1.1. General precautions

- Maintenance operation should be carried out in a bright and clean place.
- Before disassembly, provide parts racks for storage of various tools and disassembled parts.
- Arrange the disassembled parts in the disassembly sequence and use care to prevent any damage to them.

3.1.2. Cooling water

- Remove the radiator cap. Open the drain valve at the radiator lower part to drain the coolant as the right figure.

CAUTION:
When removing radiator filler cap while the engine is still hot, cover the cap with a rag, then turn it slowly to release the internal steam pressure. This will prevent a person from scalding with hot steam spouted out from the filler port.

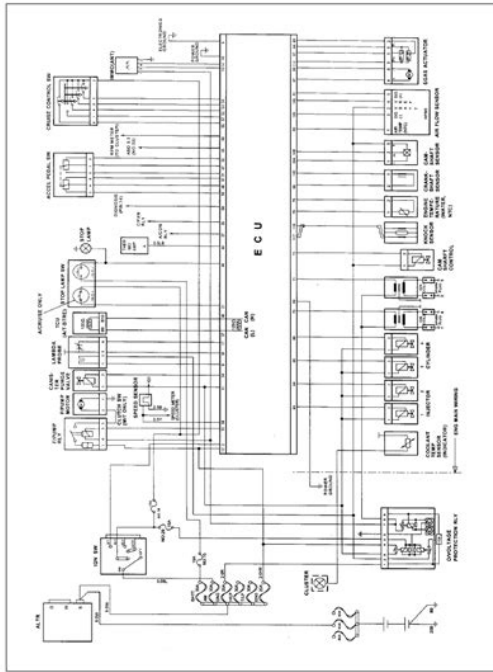

- Remove the cooling water drain plug from the cylinder block and oil cooler, various pipes, etc. and let the cooling water discharge into the prepared vessel.
